DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 25 and 26, drawn to a method for enhancing fertility by administering an effective amount of IL-11 and IL-11R α , classified in class 514, subclass 2, for example.
 - II. Claim 27, drawn to a method for enhancing fertility by gene therapy comprising nucleic acid encoding IL-11 and IL-11R α , classified in class 514, subclass 44, for example.

The inventions are distinct, each from the other because of the following reasons:

1. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the method of Invention I uses IL-11 and IL-11R α proteins for administration while Invention II uses gene therapy. Inventions I and II require separate and non-coextensive searches and searching the inventions together would impose a serious search burden.

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

2. A telephone call was made to Xiaochun Xhu on 3/1/06 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
